SAEnCompass Interdisciplinary Clinical Software

The “right” EMAR is just one component of our complete electronic medical record!

Our software provides a complete picture of the resident’s condition and plan of care:

- MDS with SA Supplement for comprehensive assessment
- Individualized care plans and linked charting
- Daily caregiver/shift documentation imported to MDS for increased RUGs
- Management tools: schedule assessments, coordinate RAPs with care plan and charting, manage resident admissions/discharges, track payources
- Communication: message center with emails and ticklers, electronic shift-to-shift report and user log to track activity
- Risk management for med errors, falls, injuries, care and property complaints, infections, and skin/wounds
- Reports for all disciplines to provide meaningful data for improved quality
